If you have a Nvidia card, I can't recommend this game. You'll get CONSTANT blue-screen crashes (Your entire PC will have to restart. I can handle normal crashes.... I can't stand blue-screens).

That being said, it's a decently fun game. If you have an AMD card, I'd say this is worth \$20-\$30. Wait for a sale.

2TB SSD. I didn\u2019t like like this game, gameplay is very slow. Shooting mechanic are not that great. Story is very boring. Graphics are good!. The physics are very good but there is not much content for that price. So buy it when there is a sale.. Fantastic stealth game, open environments with tons of clever gadgets and good third-person combat for when plans go south. Story is completely forgettable, protagonist is the classic grizzled gruff white guy, you won't remember a thing about the story afterwards, you'll just remember that boy, was it fun to shoot a lot of nazis from a mile away, right through their testes.. You can shoot nazis in the balls. Excellent game.. This is a good game and a good coop experience for two people in story mode. However the game does have some technical issues for which i am posting fixes below:

Crashing:

To fix this, you need to uncheck (disable) "Use D3D12" in options on the launcher. You also need to set screen mode to "Full Screen Borderless Window" which is also in options on the launcher.

Sound Distortion:

In the launcher, turn off "Audio Reverb Quality."

With these fixes, the game should run fine for you.

It's a good game with a range of difficulty settings which make it easy to get into.

Some of the voice acting is fairly cheesy but it's still a good satisfying, user-friendly WWII adventure game with story coop for two players.. its fun you can shoot peoples willies hehe. The sniper elite games have always been a bit lacking for me. They focus all too much on the gunplay and slow motion x-ray kills. The game lacks in terms of Story, Stealth Mechanics, Weapon Variety (outside of DLC), quality Voice Acting, etc.

Its fun, but the story is short and you'll run out of things to do rather quickly. Buy it on a sale if you're on the fence, but be aware that you won't get much out of it regardless unless you adore and can be entertained by slow motion x-ray kills alone. I can't, maybe you can.

You can shoot nazi's, what else do you want.. Crashes every 30 mins i hope nvidia and rebelion do something.. It was fun for about 8 houres. Then it got really boring because of repetetive missions just in different areas with differently named enemies. The slow motion kill cams of this game are very cool anyway and you can outsmart the AI in many different ways, which is good because it leads to a lot of creativity on how you approach the missions. However, after a few houres the game got really boring really fast.. I bought this game just to shoot Hitler's only testicle.

So.....

Nothing to see here.

Keep scrolling to see actually useful review. Like it alot, never get bored of the x-ray shots. Not much story but it's not needed either, the gameplay is solid and makes more than enough up for the is no real story.

The maps are really good, from long to short range, you can tackle the objectives how you se fit. There is no real right or wrong way.

Game is at strongest at its long rage shots, and it never gets boring to find new spots and try to do longer and longer range shots.

Personally i'd love for a Elite Sniper 5 to come out. Just finished the game. I was surprised with how short the campaign is. The game play works well, I'm not a huge fan of third person shooters but the shoulder aim helps as the player movement reminds me a bit of Ghost Recon wildlands. However, this is not an open world game. The maps are large but are only as big as the mission boundaries. Each mission loads a new map.

It's a WWII game so there isn't night vision or body armor etc etc - you go in with a pretty basic load out. However, you can swap with enemy weapons and so on. There are the usual ammo crates scattered about. Not to mention the red barrels! There are a few things you can blow up!!:)

I played it on easy mode so the enemy AI was not that difficult. I gave up on the sneaking around fairly early and just did the run and gun thing. When your cover is blown the enemy will search for you and slowly chase so it allows you to use your mines and so on through the equipment wheel which is useful. The gun play is satisfying with the sniper rifles, machine guns to your silenced pistol. Blowing things up have good effects and makes for a lot of chaos.

As I mentioned before, I completed the game. For me this is a big deal. I've been playing PC games from the first days of DOS Doom and I rarely ever make it to the end credits on most games as some quirky thing in the game turns me off to going back to it. Not so with this game. It kept me interested and engaged. The game play is somewhat slow and tedious if you want to sneak around but if you want to make noise it can get hectic.

The graphics are good and the lighting and shadows look great. I played on Ultra settings but lowered the resolution a little as my GTX1070 started to chug a little at 4k on the bigger maps. It's a good game - I did not come across any bugs or crashes but I'm not sure about the "replayability". Maybe a second time through but it's fairly linear in regards to the missions you have to complete to clear the map.

I kept feeling like I was playing a Wolfenstein game in the third person in some points in the game. Overall it's a good game worth the money. However, I did get it on sale so not sure I would pay \$60 for it but, it's a solid game and it kept me playing. That says a lot for me. Get it if you would like a fusion of Ghost Recon wildlands and wolfenstein.. ghfgfhhgfhgf. Shoot nazi in ball \ud83d\ude0e\ud83d\ude0e\ud83d\ude0e
